Contents of Volume 142, No. 1

PAGE

Biosynthesis and Degradation

Protein synthesis by synaptosomes from rat brain. Contribution by the intraterminal mitochondria.
By A. G. Hernández 7

Phospholipid synthesis in rat liver endoplasmic reticulum after the administration of phenobarbitone and 20-methylcholanthrene.
By S. C. Davison & E. D. Wills 19

The distribution of L-asparagine synthetase in the principal organs of several mammalian and avian species.
By H. A. Milman & D. A. Cooney 27

Metabolism of dihydrotachysterol and 5,6-*trans*-cholecalciferol in the chick and the rat.
By D. E. M. Lawson & P. A. Bell 37

Studies on the biosynthesis of tetrahymanol in *Tetrahymena pyriformis*. The mechanism of inhibition by cholesterol.
By A. S. Beedle, K. A. Munday & D. C. Wilton 57

A comparison of glucoside formation by liver preparations from the rabbit and the mouse.
By R. S. Labow & D. S. Layne 75

Cyclitol glucosides and their role in the synthesis of a glucan from uridine diphosphate glucose in *Phaseolus aureus*. Characterization of some cyclitol glucosides and their synthesis.
By J. Kemp & B. C. Loughman 153

Bioenergetics

Inhibition and uncoupling of photophosphorylation in isolated chloroplasts by organotin, organomercury and diphenyleneiodonium compounds.
By A. S. Watling-Payne & M. J. Selwyn 65

Studies with a reconstituted muscle glycolytic system. The rate and extent of glycolysis in simulated post-mortem conditions.
By R. K. Scopes 79

Subcellular Structures

Progesterone-induced lysis of rat kidney lysosomes as studied by changes in light-absorbance.
By P. Badenoch-Jones & H. Baum 1

PAGE

The transport of sulphate and sulphite in rat liver mitochondria.
By M. Crompton, F. Palmieri, M. Capano & E. Quagliariello 127

The amounts and rates of export of polysaccharides found within the membrane system of maize root cells.
By D. J. Bowles & D. H. Northcote 139

Cellular Interactions and Control Processes

Properties of pyruvate dehydrogenase of rat mammary tissue and its changes during pregnancy, lactation and weaning.
By H. G. Coore & B. Field 87

The relationship between the concentration of adenosine 3′:5′-cyclic monophosphate and the anti-lipolytic action of insulin in isolated rat fat-cells.
By K. Siddle & C. N. Hales 97

Folic acid metabolism in vitamin B_{12}-deficient sheep. Effects of injected methionine on liver constituents associated with folate metabolism.
By R. M. Smith, W. S. Osborne-White & J. M. Gawthorne 105

Folic acid metabolism in vitamin B_{12}-deficient sheep. Effects of injected methionine on methotrexate transport and the activity of enzymes associated with folate metabolism in liver.
By J. M. Gawthorne & R. M. Smith 119

Role of adenosine 3′:5′-cyclic monophosphate in the action of 1,1,1-trichloro-2,2-bis-(*p*-chlorophenyl)ethane (DDT) on hepatic and renal metabolism.
By S. Kacew & R. L. Singhal 145

Evaluation of glucose turnover, body mass and recycling with reversible and irreversible tracers.
By J. Katz, H. Rostami & A. Dunn 161

Determination of synthesis, recycling and body mass of glucose in rats and rabbits *in vivo* with ^{3}H- and ^{14}C-labelled glucose.
By J. Katz, A. Dunn, M. Chenoweth & S. Golden 171

Concentration of elongation factor 2 in rat skeletal muscle during protein depletion and re-feeding (*Short Communication*).
By S. D. Alexis, V. R. Young & D. M. Gill 185

PAGE

Metabolism in Whole Organisms

A new method for the preparation of uniformly ^{14}C-labelled compounds by using *Anacystis nidulans*.
By K. C. Tovey, G. H. Spiller, K. G. Oldham, N. Lucas & N. G. Carr 47

The effect of oral inorganic sulphate on the metabolism of 4-hydroxyphenethylamine (tyramine) in man: tyramine *O*-sulphate measurement in human urine (*Short Communication*).
By I. Smith & P. D. Mitchell 189

Contents of Volume 142, No. 2

PAGE

Biosynthesis and Degradation

The development of ribonuclease and acid phosphatase during germination of *Pisum arvense*.
By G. R. Barker, C. M. Bray & T. J. Walter 211

Synthesis and maturation of ribosomal ribonucleic acids in isolated HeLa cell nuclei. A tracer study on the topology of the 45S precursor of ribosomal ribonucleic acids.
By A. A. Hadjiolov & G. I. Milchev 263

The specific radioactivity of the tissue free amino acid pool as a basis for measuring the rate of protein synthesis in the rat *in vivo*.
By E. B. Fern & P. J. Garlick 413

Sterol biosynthesis by the sea urchin *Echinus esculentus*.
By A. G. Smith & L. J. Goad 421

Synthesis of polyprenyltoluquinols from homogentisate and polyprenyl pyrophosphates in particulate fractions of *Euglena* and sugar beet (*Short Communication*).
By G. Thomas & D. R. Threlfall 437

Peroxidatic oxidation of tyrosine to melanin in supernatant of crude mouse melanoma homogenates (*Short Communication*).
By R. P. Patel, M. R. Okun, L. M. Edelstein & N. Cariglia 441

Alterations in cholesterol and fatty acid biosynthesis in rat liver homogenates by aryloxy acids (*Short Communication*).
By R. J. Olson, T. E. Trumble & W. Gamble 445

Bioenergetics

The effect of energization on the apparent Michaelis–Menten constant for oxygen in mitochondrial respiration.
By L. C. Petersen, P. Nicholls & H. Degn 247

Mode of inhibition of mitochondrial energy transduction by chlorophenoxyisobutyrate.
By S. R. Panini & C. K. Ramakrishna Kurup 253

PAGE

Subcellular Structures

The differential scattering of circularly polarized light by chloroplasts and evaluation of their true circular dichroism.
By R. P. F. Gregory & S. Raps 193

Appendix: Theoretical rationale for the scattering correction of circular-dichroism spectra in dilute suspensions.
By R. P. F. Gregory & S. Raps 201

Glycosyltransferases in the Golgi membranes of onion stem.
By J. T. Powell & K. Brew 203

Cellular Interactions and Control Processes

Studies on the Golgi apparatus. Cumulative inhibition of protein and glycoprotein secretion by D-galactosamine.
By C. H. Bauer, R. Lukaschek & W. G. Reutter 221

Effect of glucagon on phenylalanine metabolism and phenylalanine-degrading enzymes in the rat.
By L. M. Brand & A. E. Harper 231

Different mechanisms of regulation of nuclear reduced nicotinamide–adenine dinucleotide phosphate-dependent 3-oxo steroid 5α-reductase activity in rat liver, kidney and prostate.
By J.-Å. Gustafsson & Å. Pousette 273

The metabolic effects of sodium dichloroacetate in the starved rat.
By P. J. Blackshear, P. A. H. Holloway & K. G. M. M. Alberti 279

Measurement of the dynamics of stimulation and inhibition of steroidogenesis in isolated rat adrenal cells by using column perfusion.
By P. J. Lowry & C. McMartin 287

PAGE

Increase in pituitary adenosine 3′:5′-cyclic monophosphate content and potentiation of growth-hormone release from heifer anterior pituitary slices incubated in the presence of 3-isobutyl-1-methylxanthine.
By J. G. Schofield & M. McPherson 295

The metabolism of macromolecules during the differentiation of myxamoebae of the cellular slime mould *Dictyostelium discoideum* containing different amounts of glycogen.
By B. D. Hames & J. M. Ashworth 301

The control of saccharide synthesis during development of myxamoebae of *Dictyostelium discoideum* containing differing amounts of glycogen.
By B. D. Hames & J. M. Ashworth 317

The effect of lysine on gluconeogenesis from lactate in rat hepatocytes.
By N. W. Cornell, P. Lund & H. A. Krebs 327

The role of adenosine 3′:5′-cyclic monophosphate in the division of WI 38 cells. The cellular response to prostaglandin E_1 and the effects of a cyclic adenosine 3′:5′-cyclic monophosphate analogue and prostaglandin E_1 on cell division.
By M. J. Kurtz, P. Polgar, L. Taylor & A. M. Rutenburg 339

The action of local anaesthetics on lipolysis and on adenosine 3′:5′-cyclic monophosphate content in isolated rat fat-cells.
By K. Siddle & C. N. Hales 345

Changes in intramitochondrial adenine nucleotides in blowfly flight-muscle mitochondria.
By S. M. Danks & J. B. Chappell 353

Adaptive changes in the capacity of systems used for the synthesis of citrulline in rat liver mitochondria in response to high- and low-protein diets.
By J. D. McGivan, N. M. Bradford & J. B. Chappell 359

PAGE

Hormonal regulation of adipose-tissue acetyl-coenzyme A carboxylase by changes in the polymeric state of the enzyme. The role of long-chain fatty acyl-coenzyme A thioesters and citrate.
By A. P. Halestrap & R. M. Denton 365

Regulation of guanylate cyclase in guinea-pig islets of Langerhans.
By S. L. Howell & W. Montague 379

Insulin release from the perfused rat pancreas. Mode of action of tolbutamide.
By V. Bowen & N. R. Lazarus 385

The effects of potassium, 5-hydroxytryptamine, adrenocorticotrophin and angiotensin II on the concentration of adenosine 3′:5′-cyclic monophosphate in suspensions of dispersed rat adrenal zona glomerulosa and zona fasciculata cells.
By J. D. M. Albano, B. L. Brown, R. P. Ekins, S. A. S. Tait & J. F. Tait 391

Production and utilization of acetate in mammals.
By S. E. Knowles, I. G. Jarrett, O. H. Filsell & F. J. Ballard 401

Effect of duration of the period after castration on the response of the rat ventral prostate to androgens (*Short Communication*).
By B. Lesser & N. Bruchovsky 429

Development

Pathways of gluconeogenesis from L-serine in the neonatal rat (*Short Communication*).
By K. Snell 433

Contents of Volume 142, No. 3

PAGE

Biosynthesis and Degradation

Lipogenesis in rabbit isolated fat-cells.
By E. D. Saggerson 477

Turnover of myelin and other structural proteins in the developing rat brain.
By M. I. Sabri, A. H. Bone & A. N. Davison 499

PAGE

Synthesis of fatty acids in the perfused mouse liver.
By D. M. W. Salmon, N. L. Bowen & D. A. Hems 611

Carnitine and trimethylaminobutyrate synthesis in rat tissues (*Short Communication*).
By R. A. Cox & C. L. Hoppel 699

PAGE

Bioenergetics

A re-evaluation of energy-independent calcium-ion binding by rat liver mitochondria.
By K. C. Reed & F. L. Bygrave 555

The influx of calcium ions into human erythrocytes during cold storage. The influences of extracellular pH, intracellular adenosine triphosphate and efflux of univalent cations.
By B. Mouat & C. Long 629

The reconstitution of functional respiratory chains in membranes from electron-transport-deficient mutants of *Escherichia coli* as demonstrated by quenching of atebrin fluorescence (*Short Communication*).
By B. A. Haddock & J. A. Downie 703

Subcellular Structures

Golgi β-glucuronidase of androgen-stimulated mouse kidney.
By C. A. Marsh, C.-W. Lin & W. H. Fishman 491

Phosphodiesterase II in epithelial cells from guinea-pig and rat small intestine.
By P. R. Flanagan & S. H. Zbarsky 545

A rapid method for the preparation of microvilli from rabbit kidney.
By A. G. Booth & A. J. Kenny 575

Heterogeneous distribution of enzymes among plasma-membrane fragments sedimenting with the microsomal fraction of rat liver.
By K. A. Norris, M. Dóbrota, F. S. Issa, R. H. Hinton & E. Reid 667

Inhibition of protein synthesis by ricin: experiments with rat liver mitochondria and nuclei and with ribosomes from *Escherichia coli* (*Short Communication*).
By M. Greco, L. Montanaro, F. Novello, C. Saccone, S. Sperti & F. Stirpe 695

Cellular Interactions and Control Processes

Lomofungin as an inhibitor of nucleic acid synthesis in *Saccharomyces cerevisiae*.
By M. Cannon & A. Jimenez 457

The effect of oxytetracycline on insulin resistance in obese mice.
By N. Bégin-Heick, M. Bourassa & H. M. C. Heick 465

The effects of 5α-dihydrotestosterone on the kinetics of cell proliferation in rat prostate.
By B. Lesser & N. Bruchovsky 483

PAGE

The control of tricarboxylate-cycle oxidations in blowfly flight muscle. The steady-state concentrations of coenzyme A, acetyl-coenzyme A and succinyl-coenzyme A in flight muscle and isolated mitochondria.
By R. G. Hansford 509

Calcium ion transport by pig erythrocyte membrane vesicles.
By J. T. Buckley 521

The estimation of rates of utilization of glucose and ketone bodies in the brain of the suckling rat using compartmental analysis of isotopic data.
By J. E. Cremer & D. F. Heath 527

Role of human skin in the photodecomposition of bilirubin.
By C. L. Kapoor, C. R. Krishna Murti & P. C. Bajpai 567

Breakdown of phosphatidylinositol provoked by muscarinic cholinergic stimulation of rat parotid-gland fragments.
By L. M. Jones & R. H. Michell 583

Phosphatidylinositol cleavage catalysed by the soluble fraction from lymphocytes. Activity at pH 5.5 and pH 7.0.
By D. Allan & R. H. Michell 591

Phosphatidylinositol cleavage in lymphocytes. Requirement for calcium ions at a low concentration and effects of other cations.
By D. Allan & R. H. Michell 599

Protein kinase activity stimulated by adenosine 3′:5′-cyclic monophosphate in synaptic-membrane fragments from ox brain. Inhibition of intrinsic activity by free and membrane-bound calcium ions.
By M. Weller & R. Rodnight 605

Comparative studies on 3-oxo acid coenzyme A transferase from various rat tissues.
By A. Fenselau & K. Wallis 619

Calcium-ion binding to the chromaffin-granule surface.
By P. M. Dean & E. K. Matthews 637

Influence of ascorbic acid on ribosomal patterns and collagen biosynthesis in healing wounds of scorbutic guinea pigs.
By R. Harwood, M. E. Grant & D. S. Jackson 641

PAGE

The effect of starvation on phosphodiesterase activity and the content of adenosine 3′:5′-cyclic monophosphate in isolated mouse pancreatic islets.
By K. Capito & C. J. Hedeskov 653

Metabolic adaptations during lactogenesis. Lactose synthesis in rabbit mammary tissue during pregnancy and lactation.
By R. W. Mellenberger & D. E. Bauman 659

Stimulation by 6-*N*,2′-*O*-dibutyryladenosine 3′:5′-cyclic monophosphate and glucocorticoids of phosphoenolpyruvate carboxykinase in the isolated perfused rat liver (*Short Communication*).
By W. B. Huttner, W. Krone, H. J. Seitz & W. Tarnowski 691

PAGE

Development

Phytochrome-induced synthesis of ribonuclease *de novo* in lupin hypocotyl sections.
By G. J. Acton & P. Schopfer 449

Thymidine kinase activity in cardiac muscle during embryonic and postnatal development.
By P. C. Gillette & W. C. Claycomb 685

Metabolism in Whole Organisms

The synthesis of [^{14}C]streptozotocin and its distribution and excretion in the rat.
By E. H. Karunanayake, D. J. Hearse & G. Mellows 673

Index 707
